THE LIGHTING FIXTURE CENTER

Thru Service We Grow

It is of vital interest to the buyer as well as the seller to unite their interests in the uplift of the industry of which both are a part.

Our success is dependent upon your success and every co-operative effort made, not only strengthens the bond between us but makes each of us stronger individually.

The old adage "Competition is the life of trade" is probably just as true as ever but the word "Competition" is taking on a new meaning or rather coming into its own real meaning. One dictionary gives as a definition of the word Competition "Common strife for the same object."

When this common object is to excell in public lighting service and two people can do work together for the same object it is going to be attained sooner than if one worked without the help of the other. This is a far cry from the "Dog in the Manger" competition we have seen so much of in the past. So if one hundred Competitors or Co-operators are working together or one thousand the results are bound to be cumulatively and individually much more satisfactory.

He Profits Most Who Serves Best.

There are certain laws of nature that are true and fixed. Water will find its level and when gravity ceases to operate the world will cease to exist.

While some individual is fooling himself thinking he is "getting by" giving poor values the above fundamental law is nevertheless at work and time will show the cheap surface veneer or the sterling character.

AVERY LIBRARY
COLUMBIA UNIVERSITY

Crescent Improved Service.

Through ten years of conscientious effort we have learned to add many good features and eliminate many poor ones.

While Crescent Service is subject to human imperfections our ideal is "perfection" and our efforts are constantly at work to weed out the poor and improve with the good. If we do not always do things just the way you think they should be done it is not from any lack of desire on the part of the men at the head of this institution and the workers in this institution to give you satisfaction. If you will Co-operate with us to the extent of telling us your side of the situation we promise you that it will be given careful consideration and if at all possible and consistent with the policies of this Company we will meet your views.

The Crescent Family.

This is a Real Company. The Crescent Brass Products Co. stock is distributed among the officers, employees and customers.

There is not one share owned by anyone not actively engaged in the Lighting Fixture business and working to see this industry as a whole advanced along the right lines.

Your order placed with this Company will be handled by people who want to merit your good will and are interested in seeing you grow with us.

We offer you this kind of Co-operation and ask you to give the same kind in exchange realizing that we grow by helping each other.

TRADE INFORMATION

Crescent Standards of Material.

The Material used in Crescent Standardized Products will be found to be of ample thickness for the work in hand. In many cases it will be found to be *oversized* or of heavier gauge than is often used for similar work.

The advantages of a substantial foundation of Material is obvious as with only a slight advance in production cost the serviceable value is greatly enhanced.

Crescent Workmanship.

The Standard of Workmanship in the Crescent Workshops is very high. The work is so systematized that quantity production of a high order is secured. If a slip occurs there is no hesitancy in "*scrapping*" parts that do not measure to Crescent Standards.

The Foundry Melting Pot has to take some things that might get by under ordinary conditions but with Crescent they must be good or they are rejected.

With Substantial material to work with and skilled help carefully supervised *Crescent Standardized Productions* carry with them a Character and a satisfaction worth while.

Crescent Finishes.

Crescent Finishes are accepted as a Standard among much of the fixture trade. Is the finish "as good as Crescent?" is a question often asked.

The most popular product of the Crescent Plating and Finishing Department is the pleasing *Cresbronz.* This is a rich statuary bronze relieved with a polished brass effect that has been developed to a nicety by Crescent Craftsmen.

Next would come *Cresgra,* which has the appearance of Butler Silver relieved by a golden hued polished brass effect.

There are the *Fine Silver Finishes* the *Kahki Brown* and the various brass finishes such as Flemish, Brushed Brass, Brushed Brass and Black, etc.

A complete polishing and plating department can meet your requirements on finishes.

Here again the extra heavy material used comes into importance. Heavy shells and spinning will stand the stress of the severe operations required in polishing and buffing without fear of the piece standing up, on part of the workman.

Packing.

Prices quoted do not include the packing charges. The packing charges include Boxes, Barrels or Cartons, Special Packing Material, and labor consumed in packing. It is our aim to keep all packing charges as low as is consistent and charge only the actual cost on our packing charges.

Shipments—Shipping Instructions.

All goods are shipped f. o. b. cars at Cleveland, no charge for cartage to Railroad Depots.

Be sure to state if you want goods shipped by Freight, Express or Parcel Post, otherwise we will be obliged to use our judgment.

Goods to be Returned.

In order to return goods, permission must first be secured from our office otherwise returned goods will be refused.

After receiving shipping instructions, see that your name and address are marked plainly on all packages.

Prices and Quotations.

Prices in this catalogue supersede all previous prices issued by us and are subject to change without notice. Verbal quotations are for immediate acceptance unless a definite time is specified.

Terms.

3 per cent. cash discount will be allowed when the full amount of cash accompanies the order.

On charge accounts 2 per cent. cash discounts will be allowed for payment within ten days *from date of invoice*, or thirty days time will be allowed for payment of invoices providing a trade acceptance is sent us due for payment at the expiration of 30 days *from date of invoice.*

Trade Acceptances.

Trade Acceptances are coming into more general use daily and have proved a big help in solving the difficulties of Credit transactions.

The Trade Acceptance is an indication of good business practice and shows a conservative policy and an ability to meet payments of accounts when due. It is customary for us to send a trade acceptance with each invoice unless the customer is in the habit of discounting bills at the end of the ten-day period. A careful compliance with the terms of sale will assist us materially in giving our trade prompt and careful service and eliminate excess overhead charges which are the natural results of extended credits.

Credit References.

To new customers who are not satisfactorily rated by the mercantile agencies it will expedite matters if they will furnish three or four references and a sufficient amount of information regarding their business to justify the extensions of the amount of credit desired.

C. O. D. Shipments.

On C. O. D. shipments as a guarantee of good faith it will be necessary for parties ordering to include with their orders an amount sufficient to insure transportation charges both ways. Such payment will be deducted from the face of the invoice as will also the 2 per cent. cash discount allowance.

Word of Appreciation.

During the past year the Crescent Brass Products Company has shown a very substantial growth which is due to the splendid support that has come from the fixture trade in general. This merely proves the truth of the slogan at the head of these notes i. e. "THRU SERVICE WE GROW."

We want the business of legitimate dealers and want an opportunity to prove to them that any business which they may entrust to us will be promptly and courteously attended to in a way in which they will like to be served.

If then we may have your co-operation our aim in each transaction will be that both parties may be benefited thereby.

THRU SERVICE WE GROW

THE CRESCENT BRASS PRODUCTS COMPANY.

New-Era

Commercial Lighting Units

There have been many improvements in commercial lighting during recent years. Our New-Era Unit, consisting of a specially designed ornamental reflector and ornamental eye-shield device, is the newest in the field, and superior in many respects. Its many points of merit make it an ideal lighting fixture for stores, offices, schools and public buildings, or wherever maximum lighting results are desired.

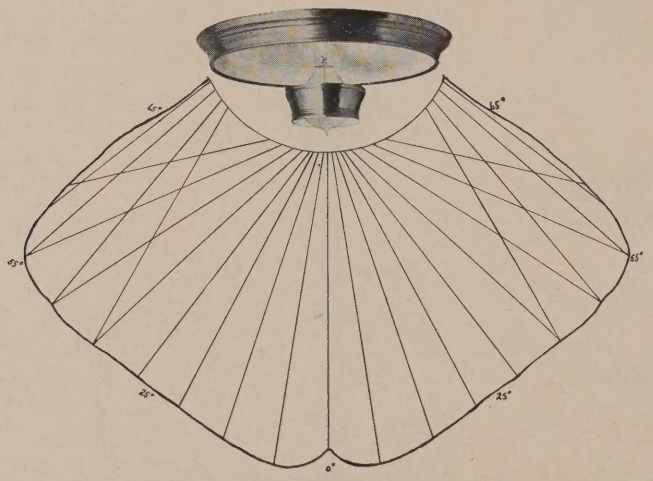
Decorative

Inexpensive

We believe that efficient lighting of stores and offices is today appreciated by most executives where greatest output and welfare of employees must be maintained.

The New-Era Unit reflects the light from "Mazda C" lamps so all the light value is properly distributed, without injurious glare. In actual test the intensity of light on the "Working Plane" where it is most necessary, showed greater candle power and better distribution than the light from many other commercial lighting fixtures.

A photometric test of a New-Era Unit and a Mazda C 200-watt lamp showed a distribution of light at 10 feet directly under the bulb and to 25 degrees on either side of the centre, ranging from 560 to 510 candle power; in the next zones, from 25 to 55 degrees, a very small depreciation was noticed, varying from 500 to 495 candle power. These are the areas which in ordinary practice should be best lighted. Practically all the light reflected from the New-Era Units is kept within these two areas, so no light is wasted. The accompanying illustration indicates the manner in which the light is reflected.



The eye-shield device consists of a metal spinning of proper size to suspend on a "Mazda C" lamp. It is made in shape and size so it will protect the eyes against injurious glare, and at the same time re-direct a large portion of the light from the lamp to the desks, counters, etc., to be illuminated.

The New-Era is supplied in the replacement type, to be attached to existing holders, or can be supplied with ceiling fittings or chain pendants.

It will be noted that the New-Era Unit is entirely open at the bottom, having no obstructing elements beneath the light source. It is on this account that we can positively guarantee that the New-Era Unit produces from 25 to 50 per cent. more light than other commercial lighting units.

The illustration on the other page shows but one of our designs. Other designs are made for all size lamps.

We Recommend the Use of Bowl-Enamel Lamps.
